# Dodi Sopandi

Software Engineer (Web)

Subang, West Java, Indonesia · dodisopandi89@gmail.com
stackfolio.web.id · linkedin.com/in/dodi-sopandi · github.com/dodi345

## SUMMARY

Software engineer focused on web applications, with two years of experience from internship to a full-time role. Builds and maintains production web platforms across the front end and back end with PHP, MySQL and JavaScript, handles day-to-day operations on Azure VMs and Cloudflare, and has led a team of four interns.

## EXPERIENCE

**Junior Software Engineer** Sep 2025 – Present
*PT Teknologi Mudah Terhubung / PT Sumrize Teknologi Cerdas*

- Build and maintain a transaction platform end to end (customer storefront, admin console and reseller portal) in a team of four developers using PHP and MySQL.
- Led four interns on a community platform: split front-end and back-end work, planned phases and tasks, reviewed code, and tested features before release (Next.js, PHP, MySQL).
- Trace production bugs through server logs and database queries to the root cause, then fix them from the database to the UI.
- Join client discussions with a teammate and turn their requests into concrete technical tasks.
- Operate servers on Azure Virtual Machines and manage Cloudflare (DNS, SSL/TLS, caching, WAF, redirect rules); update existing GitLab CI/CD pipelines.

**Part-Time Software Engineer** Jan 2025 – Sep 2025
*PT Teknologi Mudah Terhubung*

- Continued after the internship on a part-time basis, developing and maintaining web applications.
- Fixed bugs, adjusted features, and checked application flows, coordinating with the team on technical issues.

**Software Engineer Intern** Aug 2024 – Jan 2025
*PT Teknologi Mudah Terhubung*

- Started with data analysis tasks, then moved into web development: UI fixes, feature adjustments and simple feature implementation.
- Learned the team workflow: version control with Git, debugging and basic deployment.

## SKILLS

**Languages:** PHP, JavaScript, SQL, HTML, CSS; currently learning Go

**Front end:** React, Next.js, responsive web design, UI slicing

**Back end & data:** PHP, MySQL, input validation, API integration

**Cloud & infra:** Azure Virtual Machines (main), AWS EC2, Google Compute Engine; Cloudflare (DNS, SSL/TLS, caching, WAF and rate limiting, redirect rules, Workers and Pages); GitLab CI/CD; Git

**Spoken languages:** Indonesian (native); English (technical documentation, written work communication, meetings)

## EDUCATION

**Politeknik Negeri Subang** 2022 – 2025
*Diploma (D3) in Information Systems*

## ORGANIZATION

**Organizing Committee Chair, Musyawarah Besar 2023** 2023
*HIMATIKOM, Politeknik Negeri Subang*

- Led the committee for the association's general assembly, including the agenda and the election of the 2023–2024 chair and vice chair.

**Member, Research and Technology Department**
*HIMATIKOM, Politeknik Negeri Subang*

- Contributed to IT Club, a student forum on coursework and technology, and supported the department's programs.

## TRAINING

DQLab – Python Fundamentals · DQLab – SQL Fundamentals
